- Map co-editing in real time
- Online file storage
- Folders & sub-folders
- Integration with web services
- Version control
- Check-in/check-out process
- Sync with Mindjet® productivity software
- Centralised account management
- Multiple administrators

Work today means working together. Very few activities of any scope and significance can be completed successfully without multiple contributors and reviewers. Mindjet Connect® is an online service that lets people with shared goals get more done, in the cloud and across devices.

In addition to online file sharing, document management, and co-editing capabilities, Mindjet Connect provides an intuitive visual framework that helps people brainstorm ideas, solve problems and process information together. Mindjet Connect lets people interactively map out work in progress so that all participants can visualise the process from initial concept to strategy to execution. With Mindjet Connect, people can make decisions and stay in sync on opportunities, projects and strategies.

Content Management

Centralised File Storage in the Cloud

- Easily store, share, manage and access all your files online and from virtually any device.
- Organise your work in secure online folders, using full text search to find the file(s) you're looking for.
- Collect, organise and archive relevant information from web searches and social media (i.e. Twitter®, LinkedIn®, Google®, Bing®, Evernote®).
- Use Mindjet Connect as your central workplace, downloading to multiple devices as needed to work offline.

Visual Framework

The Power of Visualisation

- Easily capture, organise and connect ideas and information so you and your team can go from brainstorming to establishing priorities, creating plans and taking action.
- Map goals, issues and requirements to help everyone see information in context.
- Map relevant information to keep everyone on the same page.
- Map out tasks, schedules and resource assignments to clarify workflows and ensure alignment.

Sharing and Collaboration

Collaborate in Real Time or Anytime

- Work together regardless of location.
- Share your work with as many people as you want both inside and outside of your group or organisation.
- Collaborate simultaneously using flexible co-editing capabilities.
- Securely manage and administer across distributed teams.

Mobile Access

Access anywhere, Anytime

- Create, collaborate and access your files anywhere and from any device.
- Use Mindjet's free mobile apps to take your work with you.
- Stay in sync with your team anytime, anyplace.
- Capture then store ideas and notes in meetings or on the go.
